BRIDGING ACCESS FOR MS ACTIVE DIRECTORY ADVANCED IDENTITY ADAPTER

The CloudAccess Active Directory Advanced Adapter provides cloud-based, seamless integration that promotes automated provisioning, reconciliation and password management. As AD serves as a centralizing access hub across your enterprise for databases that contain sensitive personal information, it is a mission critical requirement to best secure its credential protections and privileges. This is seamlessly achieved via CloudAccess advanced adapters and our scalable cloud-based identity management solution.

Our agent-less Advanced Adapter for Active Directory acts as a trusted administrator for such tasks as creating accounts, managing Permission Sets and Profiles, and resetting passwords. This connector allows your rules and roles to fluidly integrate into the CloudAccess Identity Mgmt solution and creates a sphere of control to satisfy compliance and enforces company access policies.

Key Features
• User Security Management
• Password Management
• UserGroup Management
• Automatic role-based and group-based provisioning
• Permission Set Assignment
• Authenticate on Unique ID, PW
• Supports ADFS integration
• Supports bulk import, 2-way sync

- Contextual modification/change synchronization
- Password hashing and decryption keys
- Flag expiring passwords for removal modification
- Validate and resolve authentication to server
- Promote password self-service reset
- Default Log Entry Change filter setting
- ...and more!

Active Directory Advanced Adapter Benefits

By utilizing our agent-less, federated AD Advanced Adapter or any of our vast library of integrated, cloud based application connectors, you can realize immediate results through faster deployment and our automatic provisioning capabilities. This eases the burdens of regulatory compliance, and significantly reduces risk and the associated costs and resources. As part of an overall IAM initiative (which includes SSO), this expands enterprise visibility to maintain an end-to-end security program.

GROWING CONNECTOR LIBRARY

The CloudAccess Advanced Adapter Series incudes seamless connectors and adapters to several of the key applications and platforms you need to secure.

- Salesforce.com
- SAP ECC
- AS400 (i Series)
